

TER Chemicals acquires Selectnutrition and strengthens its position in the food & nutrition segment

Hamburg/Zurich, 7th January 2026

TER Chemicals announces the acquisition of the nutrition business unit of the Selectchemie group. With this strategic decision, TER Chemicals is sending a clear signal for growth in the food & nutrition sector and is further expanding its presence in the Swiss market as well as throughout the DACH region.

The nutrition division of Selectchemie, which has been operating under the name Selectnutrition, is a leading distributor for the Swiss food and supplement industry, representing a wide range of renowned suppliers. With its own application laboratory and a broad product portfolio, the company's food experts develop innovative solutions and concepts for numerous segments of the industry.

Selectchemie will focus more consistently on the pharmaceutical sector in the future and has therefore decided to hand over the Selectnutrition business to a trusted partner. Both companies agreed on the acquisition in Zurich in December 2025. In addition, a transition period until April 1, 2026 has been arranged to ensure the smooth transfer of ongoing business and partnerships.

As part of the acquisition, TER Chemicals will take on all employees of Selectnutrition and ensure seamless integration into the existing Swiss entity, TER Schweiz AG.

For Selectchemie, as a family-owned company, it was of central importance in the process that the nutrition business would transition into responsible hands. "With TER, which is also a family-run company, we have found a partner who shares our values and will continue to develop the business sustainably and with trust," says Oliver Kühn, CEO of Selectchemie.

"With the acquisition of Selectnutrition, we are strengthening our European position in the food & nutrition sector and creating the foundation for further growth in Switzerland and beyond with innovative solutions. We are delighted to welcome all employees of Selectnutrition to the TER Group and to shape the future together with them," explains Andreas Früh, CEO of the TER Chemicals Group.

About TER Chemicals

TER Chemicals, one of three divisions of the TER Group, is a global distributor and partner for a wide range of industries - from technical applications to food and personal care. With a broad portfolio and technical expertise, TER Chemicals offers chemicals, ingredients, and materials that make a difference, from more than 20 office locations worldwide.

About Selectchemie

Selectchemie AG is a privately owned Swiss distribution and service company specializing in pharmaceutical active ingredients, excipients, and services. For more than 55 years, Selectchemie has been providing customers worldwide with high-quality solutions and extensive technical expertise.
