

Archroma and TER Chemicals announce Distribution Partnership for Polymer Dispersions in Europe

[Pratteln/Hamburg, 1st June 2026] – Archroma and TER Chemicals have entered into a strategic distribution partnership to bring Archroma’s advanced polymer dispersions to the European market, including paints & coatings, construction adhesives and sealants (CAS).

Under the agreement, TER Chemicals will market and distribute Archroma’s portfolio of high-performance binders, rheology modifiers and dispersing agents for the CAS market. The partnership expands access to sustainable, water-based emulsion technologies engineered to meet demanding performance requirements and evolving environmental standards.

Archroma is recognized as a global leader in emulsion polymerization, with a strong track record of serving CAS customers in Latin America, Asia, Middle East and Africa for decades. Through this collaboration, its dispersions will now be readily available to CAS customers across Europe.

“We are proud to be appointed as Archroma’s distribution partner for this important market segment”, said Oliver Leptien, COO of TER Chemicals. “This partnership strengthens our portfolio with tailored sustainable solutions that perfectly complement our existing offering. Supported by our technical expertise and robust logistics network, we are well-positioned to help customers develop the formulations of tomorrow.”

Plamen Gospodinov, Vice President EMEA at Archroma Packaging Technologies: “We are delighted to introduce our high-quality polymer dispersions to the European market through TER Chemicals. Their strong regional presence and application expertise make them the ideal partner to bring our sustainable portfolio closer to customers.”

The product range includes solutions designed for architectural and industrial coatings, construction adhesives, sealants and further technical applications, combining advanced performance attributes, including high gloss, resistance to UV, water, dirt and scratch, and weatherability, with a clear focus on sustainability and regulatory compliance.

By uniting Archroma’s technological capabilities and manufacturing expertise with TER Chemicals’ market reach, technical service and supply chain excellence, the partnership is positioned to support customers in achieving higher performance standards while advancing their sustainability goals.

About Archroma

Archroma is a global, diversified provider of specialty chemicals serving the branded and performance textiles, packaging and paper, and construction markets. The company's purpose is to lead the industry towards a more sustainable future for our customers and markets, empowering customers globally with local support to achieve their sustainability goals.
