REACH Statement

The REACH Regulation (EU) no. 1907/2006 is a regulation of the European Union, adopted to improve the protection of human health and the environment from the risks that can be posed by chemicals, while enhancing the competitiveness of the EU chemicals industry.

Since June 2008, all substances manufactured or imported in Europe by a company in quantities of at least 1 ton per year and per legal entity are subject to registration. In this context, registration means that these substances must be notified by each of these companies to the European Chemicals Agency (ECHA), including specified information.

We, the TER Group, are responsibly fulfilling our obligations under REACH and have implemented appropriate processes to meet all requirements of this regulation.

We ensure that all products supplied by TER Group are REACH-compliant.

In addition, all employees are regularly trained and further educated in the field of chemical compliance so that they are always up to date with the current regulations.

For us, distribution excellence means responsible care with chemicals!
